

ICD-9 CM GROUPS

		BWC arranges ICD-9 codes into numeric groups. An ICD-9 group is defined as an injury or condition that is similar in nature and/or involve the same body part and can contain one or more ICD-9 codes. All codes in that group are interchangeable and can be used for both allowance and reimbursement purposes.
		When using the ICD-9 group document, keep these things in mind:
		1. Each group is assigned an abbreviated group name corresponding to the ICD-9 chapters in the book. Each code with the same group name resides in the same group.
		2. Individually listed codes minus a group name appear blank and default to the standard narrative description and exist in a group of one.
		3. An ICD-9 code may only appear in one ICD-9 group.
		4. All ICD-9 codes are not addressed or listed therefore reside in a group of one.
		The following reference table identifies the ICD-9 codes listed in the groups. This table will assist you in locating any ICD-9 code within a group.
		PLEASE NOTE: This is not the complete list of ICD-9 codes. To obtain a comprehensive list an ICD-9-CM book must be purchased.
		If you have questions regarding this document please contact Shannon Lane, RHIA, Ohio Bureau of Workers' Compensation, Policy and Support at (614)466-0498 or e-mail Shannon.Lane@BWC.State.Oh.Us.
