

HAZCOM Micro Videos Training Series Guide

We designed this micro video training series to assist your Hazard Communication trainings and provide reference for related questions. Consult your BWC safety consultant if you have further questions.

You can have your employees view the short videos by sharing the links to each video below.

After viewing the series, employees can [complete the knowledge assessment](#) to verify competence and to give them an opportunity to ask questions or provide suggestions for your Hazard Communication program. Below, in gray, are the answers to the assessment questions. You can retain completed assessments for your employee training records.

Once employees complete the assessments, you can address any deficiencies or questions in either a one-on-one or group setting.

Intro and Basic Hazard Communications – [Watch video](#)

1. What does GHS stand for? Globally Harmonized System
2. What is the OSHA Standard for Hazard Communication? OSHA CFR 1910.1200
