

**4123: 1-7-07 Scrap breakers.**

(A) The breaking of scrap or castings by the use of a demolition weight inside the foundry building during regular operating periods is prohibited.

(B) Where a demolition weight is used to break skulls and scrap outside the foundry building, the operation shall be performed in a restricted or guarded area identified by appropriate signs and away from employees not involved in demolition work.

Effective: 1/1/81
