## **INVALID ICD-9 CODES**

This document contains five sections:

	<b>PAGE</b>
1. BWC justifications for the identification of an invalid ICD-9 code.	<b>3</b>
2. 2001 <b>Invalid</b> ICD-9 codes	<b>4</b>
3. <b>Invalid</b> numeric ICD-9 codes	<b>5</b>
4. <b>Invalid</b> 'V' codes	<b>72</b>
5. <b>Valid</b> 'V' codes	<b>75</b>

***PLEASE NOTE: This is not the complete list of ICD-9 codes. To obtain a comprehensive list an ICD-9-CM book must be purchased.***

The first document includes the rationale for identifying an ICD-9 code being named as BWC Invalid.

The second document is the 2001 **Invalid** ICD-9 code revisions only.

The third document is strictly numeric listing **each** individual **Invalid** ICD-9 code with its corresponding narrative description.

The fourth document contains only 'V' codes listing **each** individual **Invalid** 'V' code with its corresponding narrative description.

The fifth document lists **each** individual **Valid** 'V' code used for billing purposes only.

The codes are **not** acceptable as BWC allowed injuries/conditions. BWC will no longer reimburse when these codes are billed. Justifications for identifying an **Invalid** ICD-9 diagnosis code are the following, therefore defined as :

- a code is for an injury/condition that is not causally related to an industrial injury or occupational disease.
- application of proper coding principles, (code assignment requires the highest level of specificity i.e. must assign the maximum number of digits for a code). BWC has identified each three and four digit codes that require a fourth or fifth digit respectively.
- an unspecified injury/condition or site code therefore a more specific code exists.

**Condition example:** 719.9 Unspecified disorder of joint

**Site example:** 848.9 Unspecified site of sprains and strains

- symptom(s) codes. Symptom and abnormal finding codes are **not** considered as allowed injury/condition(s).

**Example:** 724.5 Backache, unspecified

- a multiple injury/site(s)code. Reported injuries/conditions with more than one injury/site are assigned individual codes.

**Example:** 819.0 Multiple fractures involving both upper limbs, closed
