Ohio Safety Congress & Expo

**#202 Caring for Patients Influenced by Drugs – Basic**

1:30 to 3:30 p.m. – Tuesday, March 27

This panel discussion will help emergency first responders identify and properly treat patients who may be under the influence of street drugs. Panelists will share recommendations for rendering safe and effective treatments. They'll also discuss how intoxication by traditional and non-traditional drugs, including the synthetic drug bath salt, affects patient behavior in emergency situations. You will be able to recognize common physical signs and symptoms of street drug intoxication; identify current trends in street drug use; and explain principles of treatment for patients under the influence of drugs.

Credits: 0.2 IACET; 2 EMS; 1 RCH; 2 BENHA

Developed by the Emergency Medical Services committee

Presented by Robert Lantman, Firefighter, NREMT-P, Fire service and EMS instructor, FSI, CFEI, captain, Clearcreek Fire District, Springboro; and Jason Pickett, MD, assistant professor of emergency medicine, EMS director, department of emergency medicine, Wright State University

Notice: As the instructor will provide handouts the day of the workshop, participants are strongly encouraged to register in advance.
