**#511 Understanding the Concepts of the Incident Command System (ICS) – Intermediate
8:15 to 9:15 a.m. – Wednesday, March 28**

When a disaster or other major emergency happens it's not business as usual! This session will outline the importance of using Incident Command (IC) under the National Incident Management System (NIMS). The presenter will explain many of the key concepts behind ICS, why it's important to use when working with other agencies and how you can customize it for your organization. The session will include some of the tools used to make ICS even easier to use such as forms, job action sheets and ID vests. You will be able to identify the key concepts of the ICS for workplace emergencies; explain the importance of using common and simple language during emergencies; and describe how to apply ICS concepts within different organizations.
