#929 Safety Management Systems and OHSAS 18001 – Intermediate

9 a.m. to 4 p.m. – Tuesday, March 27

The implementation of International Standards Organization (ISO)-based management systems provides organizations with tools to monitor and improve organizational performance. In this full-day session, participants will learn the basics of Occupational Health and Safety Management and Occupation Health and Safety Assessment Series (OHSAS) 18001, the relationship between OHSAS 18001 and other management standards such as ISO 14000 and ISO 9001. The session will cover the requirements of an Occupational Health and Safety Management System (OHSMS), the key definitions of an OHSMS and documentation needed to implement it. You will be able to discuss the basics of occupational health and safety management; distinguish the relationship between Occupational Health and Safety Management System (OHSAS) 18001 and other management standards such as ISO 14000 and ISO 9001; explain OHSAS 18001; list the requirements of an OHSMS; list the key definitions of an OHSMS; and summarize documentation needed to implement an OHSMS.
