

Streaming Videos

August 2013

In those cases where the video title differs between BWC and the streaming service, the difference is noted.

All of these videos are also available to borrow in DVD or VHS format.

Construction Safety

1. Competent person and soil classification (Competent person and soil testing)

Describes the requirements for analyzing and classifying soil from trenches and excavations. Demonstrates both visual examination and manual testing. 2011; 20 minutes; DVD 400132; VHS 600132

2. Competent person: trenching and shoring (Trenching and shoring safely: the competent person)

Provides an introduction to the role and duties of the competent person in trenching and shoring. Includes the responsibility for inspections, soil classification, trench protection and following OSHA's requirements. 2011; 29 minutes; DVD 400129; VHS 600129

3. Heat stress in construction environments

Tells construction workers how to prevent heat-related illnesses by replenishing fluids and electrolytes, acclimatizing, dressing appropriately and paying attention to the body's signals. 2009; 12 minutes; DVD 400120; VHS 600120

4. Safety Bob's construction safety orientation

Discusses a variety of safety issues vital in keeping construction workers from getting hurt. Covers PPE, trenching, ladders, scaffolds, fall protection and electricity. 2007; 22 minutes; DVD 400105; VHS 600105

5. Slips, trips and falls in construction environment

Examines how to prevent slips, trips and falls. Covers center of gravity and balance, walking surfaces, housekeeping and footwear. Includes how to fall properly and first aid. 2012; 18 minutes; DVD 400011

6. Flagger safety (Work zone traffic control and flagger safety)

Provides an introduction to safety issues for flaggers: personal safety, sign installation, positioning, stopping and releasing traffic and night work. Produced for use in Washington, but applies to Ohio. 2009; 17 minutes; DVD 400101; VHS 600101

Driving Safety

7. Distracted driving: at what cost?

Emphasizes the importance of controlling distractions while driving, and shows the potential consequences of eating, talking on the phone or taking eyes off the road while driving. 2004; 16 minutes; VHS 650050

8. Winter driving: when the rules change

Illustrates the importance of adjusting driving techniques during the winter. Also covers vehicle preparation, maintaining good visibility and survival supplies and techniques. 2005; 15 minutes; DVD 450076; VHS 650076

General Workplace Safety

9. 101 Days of summer safety

Provides safety tips for common summertime activities, such as vacation driving, sports, yard maintenance, swimming and boating. 2008; 20 minutes; DVD 490204; VHS 690204

10. Abrasive blasting safety (Abrasive blasting)

Discusses safety practices related to abrasive blasting including PPE, equipment inspection and potential hazards. 2003; 12 minutes; VHS 600078

11. Compressed air safety (Compressed air safety: concise version)

Features four workplace incidents that illustrate the hazards of compressed air. Covers the dangers of cleaning with compressed air, use of hearing protection in noisy environments and inspection and maintenance of compressed air equipment and systems. 2001; 15 minutes; DVD 420357; VHS 620357

12. Convenience store safety

Provides an orientation to safety and security for employees of convenience stores. Covers what to do if a robbery occurs, back injury prevention and proper housekeeping. 2011; 12 minutes; DVD 490227

13. Dealing with drug and alcohol abuse for employees

Presents information about substance use and abuse, including commonly used drugs, dependency and recovery. Addresses drug-free workplace policies and what to do if an employee suspects a co-worker of substance use on the job. 2006; 19 minutes; DVD 400064; VHS 700064

14. First aid: until help arrives

Features Martin L'Esperance demonstrating how to respond in a variety of emergency situations. Covers universal precautions, CPR, heart attacks, choking, bleeding, fractures and injury prevention. 2008; 20 minutes; DVD 430118; VHS 630118

15. Hazard communication (Hazard communications for restaurants)

Teaches restaurant workers the basics of safely using chemicals and other hazardous materials, including how to read labels and material safety data sheets. 2010; 11 minutes; DVD 490053; VHS 690053

16. Knife safety in the workplace

Presents safe work practices for a wide variety of industrial and food-processing knives. Covers sharpening and changing blades, the hazards of dull blades, cut-resistant gloves and the consequences of knife injuries. 2004; 16 minutes; DVD 420421; VHS 620421

17. Landscape power tool safety

Describes the safe operation of four of the most widely-used landscape power tools: chain saws, string trimmers, blowers and pole saws. Stresses the use of personal protective equipment. 2009; 22 minutes; DVD 490016

18. Maintaining your safety (non-graphic)

Focuses on best safety practices for industrial maintenance workers. Covers lockout/tagout, electrical work, ladders, elevated work platforms, fall arrest equipment, tools and resisting the pressure to "fix it fast." 2010; 20 minutes; DVD 420065; VHS 620065

19. Office ergonomics: adjusting your workstation and posture (Ergonomics: adjusting your computer workstation)

Demonstrates how to adjust your computer workstation to fit your body, a five-step process that involves the chair, keyboard, monitor, accessories and taking breaks. 2011; 14 minutes; DVD 440085; VHS 640085

20. Office injury prevention

Stresses the importance of a good safety attitude in preventing office injuries. Covers housekeeping, slips, trips and falls, lifting, ergonomics, hygiene and emergency response. 2009; 18 minutes; DVD 440075; VHS 640075

21. Office safety: it's not magic

Presents office safety information in an entertaining fashion using magic tricks. 2007; 14 minutes; DVD 440068; VHS 640068

22. Operating electric pallet jacks safely

Discusses how to safely operate electric pallet jacks so operators can deliver their loads while avoiding injury and property damage. Covers both walkie and rider pallet trucks. 2005; 15 minutes; VHS 620335

23. Pedestrian safety in industry (Pedestrian safety in industry: concise version)

Encourages increased awareness of walking hazards in the industrial environment. Covers workplace signs, slips and falls, material handling equipment, overhead hazards and parking lots. 2007; 17 minutes; DVD 420356; VHS 620356

24. Personal hygiene in the workplace

Addresses the sensitive topic of personal cleanliness and appearance and how it affects working relationships and productivity. 2011; 7 minutes; DVD 400042; VHS 700042

25. Reach truck safety

Points out the differences between narrow-aisle reach trucks and other forklifts. Covers what reach trucks are used for, pre-operational inspection, plugging and braking, load handling and tipovers. 2011; 15 minutes; DVD 420022; VHS 620022

26. Safe operation of scissor and boom lifts

Discusses the safe operation of elevated work platforms, showing a variety of lifts in various industrial environments. Covers operator training, stability, inspection, safe driving and fall prevention. 2006; 19 minutes; DVD 420338; VHS 620338

27. Safety procedures for lawn mower operators

Addresses general safety issues for workers who operate lawn mowers, including pre-operational inspection, personal protective equipment and mowing around the public. Offers specific guidelines for operating walk-behind and ride-on mowers. 2009; 20 minutes; DVD 490017

28. Safety shower's and eyewashes

Presents an overview of eye washes and safety showers: how they work, how to access and use them in an emergency and how to maintain them. 2011; 12 minutes; DVD 430007; VHS 630007

29. Solid waste series: backing accident prevention (Backing accident prevention: solid waste)

Explains the measures drivers should always take to prevent backing accidents while driving a solid waste collection truck, including the use of spotters. 2009; 10 minutes; DVD 420324; VHS 620024

30. Solid waste series: commercial pick-up (front-end loading and roll-offs) (Commercial pick-up: solid waste)

Focuses on the commercial pick-up of solid waste. Covers driving safety, container pick-up, roll-off sites, hot loads, transfer stations and landfills. 2009; 11 minutes; DVD 420101; VHS 620101

31. Solid waste series: hazard communications (Hazard communications: solid waste)

Presents basic information about hazardous materials in the workplace, including labels and material safety data sheets. Geared to solid waste collection workers. 2009; 12 minutes; DVD 420014; VHS 620015

32. Solid waste series: pre-trip inspection (Pre-trip inspection: solid waste)

Presents basic information about hazardous materials in the workplace, including labels and material safety data sheets. Geared to solid waste collection workers. 2009; 12 minutes; DVD 420399; VHS 620100

33. Solid waste series: residential operations (Residential pick-up: solid waste)

Reviews the hazards of residential pickup of solid waste, and recommends best practices. Addresses both manual and automated pickup. 2009; 11 minutes; DVD 420012; VHS 620013

34. Solid waste series: route safety analysis (Route safety analysis; solid waste)

Encourages drivers to identify and report hazards and unsafe conditions along their solid waste collection routes, including pavement damage, container accessibility and hazardous waste. 2009; 9 minutes; DVD 420081; VHS 620081

35. Solid waste series: safety orientation (Safety orientation: solid waste)

Provides a broad overview of the hazards that solid waste collection workers face. Geared to new employees. 2009; 12 minutes; DVD 420075; VHS 620075

36. Stored energy: the hidden hazard

Raises awareness about the stored energy hazards of things such as loaded pallets, bulk material, cables, doors and heavy equipment found in receiving areas, warehouses and maintenance areas. Includes additional section on railcars. 2007; 18 minutes; DVD 420374; VHS 620374

37. Supermarket series: baler safety (Baler safety)

Demonstrates the safe operation of balers, used in stores to crush and bale cardboard. 2011; 7 minutes; DVD 490229; VHS 690229

38. Supermarket series: box cutter safety (Box cutter safety)

Describes how to use box cutters safely including cutting techniques, changing and disposal of blades and storage. 2011; 6 minutes; DVD 490230; VHS 690230

39. Supermarket series: preventing slips, trips and falls (Preventing slips, trips, and falls for retail stores)

Urges store employees to take responsibility for preventing slips, trips and falls by cleaning up spills, removing hazards, wearing appropriate footwear, etc. Addresses both employee and customer safety.

2011; 9 minutes; DVD 490231, VHS 6902321

40. Supermarket series: safety orientation (Safety orientation for retail)

Provides a general overview of supermarket safety issues, including safe lifting techniques; prevention of cuts and burns, and slips, trips and falls; food safety; hazard communication; and machine operation.

2011; 20 minutes; DVD 490228; VHS 690228

41. Take safety home: preventing off-the-job injuries

Features Martin Lesperance, retired firefighter and paramedic, recalling true stories of off-the-job incidents resulting in injuries and deaths, and encouraging workers to take workplace safety practices home. 2009; 20 minutes; DVD 490001; VHS 690001

42. Tom Harvey's safety leadership for everyone (Safety leadership for everyone)

Features Tom Harvey discussing the traits that make a good safety leader and stressing that all employees can be safety leaders. 2004; 23 minutes; VHS 620291

43. Understanding and preventing heat-related illnesses

Familiarizes viewers with the symptoms of specific heat-related ailments and how to treat them. Describes how heat affects the body and the precautions necessary when working in hot environments.

2011; 16 minutes; DVD 430135

44. Utility cart safety

Provides an overview of utility cart safety, covering inspections, safe operating procedures, rules for riders and pedestrians. 2002; 10 minutes; VHS 620177

45. Video guide to chain saw safety (Chain saw safety for landscape operators)

Demonstrates how to effectively and safely use chain saws in landscape maintenance. Includes personal protective equipment, safety features, maintenance tips and safe operation. 2007; 23 minutes; DVD 490173; VHS 690173

46. Walkie stacker safety

Familiarizes viewers with the safe operation of walkie stackers, also known as straddle trucks. Covers the daily inspection, center of gravity, stability triangle and general safe operating guidelines. 2012; 10 minutes; DVD 420908; VHS 620908

47. Winter safety

Presents off-the-job safety information for winter weather and the holidays. Covers warm clothing, shoveling snow, driving, fire safety and holiday parties. 2009; 16 minutes; DVD 490214; VHS 690214

Human Resources**48. Preventing harassment: creating a positive workplace**

Illustrates common types of harassment and how it affects the industrial workplace. Describes how to respond to harassment and how to prevent your own behavior from being construed as harassment. 2011; 21 minutes; DVD 400148; VHS 700148

49. Workplace harassment in industrial facilities (Workplace harassment industrial)

Addresses all types of harassment: verbal abuse, threats, harassment and violence, sexual harassment and stalking. Illustrates with examples and offers strategies. 2007; 17 minutes; DVD 400141; VHS 700141

50. Workplace harassment in the office (Workplace harassment office)

Addresses all types of harassment: verbal abuse, threats, harassment and violence, sexual harassment and stalking. Illustrates with examples and offers strategies. 2007; 17 minutes; DVD 400142; VHS 700142

Laboratory Safety**51. Laboratory safety series: electrical safety in the laboratory (Electrical safety in the laboratory)**

Encourages safe electrical work practices in the laboratory. Covers the fundamentals of electrical current and grounding as well as the use of electrical equipment around flammables and the procedures for electrical emergencies. 2011; 12 minutes; DVD 470071

52. Laboratory safety series: flammables and explosives in the laboratory (Flammables and explosives in the laboratory)

Addresses the safe work practices required when working with flammable and explosive chemicals in the laboratory. Includes ventilation, storage, disposal and spills. 2011; 14 minutes; DVD 490232

53. Laboratory safety series: handling compressed gas cylinders in the laboratory (Compressed gas cylinders in the laboratory)

Instructs lab workers on the safe handling of compressed gas cylinders. Covers the four compression methods, cylinder storage, moving and installation, regulators, pressure relief devices and leak emergencies. 2011; 15 minutes; DVD 490234

54. Laboratory safety series: laboratory ergonomics (Laboratory ergonomics)

Teaches laboratory employees how good body mechanics and a properly-arranged workstation can prevent injuries. Discusses the positioning of tools and materials, maintaining a neutral body position, glove fit, lifting and how to avoid eye, neck and back strain. 2011; 12 minutes; DVD 440084

55. Laboratory safety series: orientation to laboratory safety (Orientation to laboratory safety)

Presents an overview of laboratory safety issues: personal protective equipment, laboratory apparatus, lab hoods, chemical storage, disposal and labels, housekeeping and emergencies. 2011; 12 minutes; DVD 490223

56. Laboratory safety series: planning for laboratory emergencies (Planning for laboratory emergencies)

Encourages lab workers to be prepared for emergencies by becoming familiar with the emergency plan and knowing the steps to take in the event of a spill, fire or explosion. Covers spill cleanup, fire extinguishers, and safety showers and eye washes. 2011; 15 minutes; DVD 490233

57. Laboratory safety series: safe handling of laboratory glassware (Safe handling of laboratory glassware)

Reminds lab workers how to prevent glassware-related accidents. Covers glassware handling and cleanup procedures, cutting and bending glass tubing, vacuum operations and cleaning up after glassware accidents. 2011; 13 minutes; DVD 490236

58. Laboratory safety series: safety showers and eye washes in the laboratory (Safety showers and eye washes in the laboratory)

Demonstrates how to use safety showers and eye washes in an emergency. Geared to chemical laboratories but applicable to other workplaces as well. 2011; 9 minutes; DVD 430132

OSHA Compliance

59. 2012 NFPA 70E: electrical safety in the workplace

Explains in detail critical parts of NFPA 70E, and highlights the changes in the 2012 edition. 2012; 25 minutes; DVD 470011

60. ABC's of your personal fall arrest system

Shows how to properly select and use personal fall arrest systems. Covers both construction and industrial settings. 2002; 15 minutes; VHS 600182

61. ANSI material safety data sheets (ANSI MSDS update)

Explains the standardized format of the ANSI material safety data sheet which aims to make MSDSs easier to read. Describes how the 16 sections answer four basic questions about working safely with hazardous chemicals. 2007; 13 minutes; DVD 490181; VHS 690181

62. Bloodborne pathogens: always protect yourself

Urges viewers to protect themselves first before assisting a co-worker who has been injured. Covers how bloodborne diseases are transmitted and how to prevent exposure through universal precautions. 2009; 16 minutes; DVD 430005; VHS 630005

63. Bloodborne pathogens: training for employees

Discusses the hazards associated with bloodborne pathogens, including bloodborne diseases, routes of entry, universal precautions, handling and disposal of contaminated items, responding to exposure situations and decontamination. 2008; 17 minutes; DVD 430122; VHS 630122

64. Confined spaces and the entry permit system

Covers the confined space entry permit system, confined space hazards, and the responsibilities of each of the team members. 2002; 15 minutes; DVD 420008; VHS 620008

65. Compressed air safety

Features four workplace incidents that illustrate the hazards of compressed air. Covers the dangers of cleaning with compressed air, use of hearing protection in noisy environments and inspection and maintenance of compressed air equipment and systems. 2001; 15 minutes; DVD 420357; VHS 620357

66. Conveyor safety in the workplace

Discusses the various hazards posed by conveyor systems and safe work practices. Features testimonials from workers who have been injured by conveyors. 2002; 18 minutes; VHS 620028

67. Crane signal person basic training

Presents an overview of crane signal person roles, responsibilities, signals and safety considerations. Demonstrates hand signals for various kinds of cranes used in construction and voice signals using portable radios. 2011; 17 minutes; DVD 400183; VHS 600173

68. Electrical safety

Teaches employees how to work safely with and around electricity, covering how electricity works, recognizing and avoiding common electrical hazards and dealing with an electrical accident. 2010; 18 minutes; DVD 470017; VHS 670017

69. Electrical safety awareness for non-electricians

Provides an introduction to electrical safety, defining terms, discussing hazards, showing examples of unsafe and safe behaviors, and demonstrating how to respond to an accident. 2002; 18 minutes; DVD 470072; VHS 670042

70. Fall factors: understanding and preventing slips, trips, and falls

Explores the four factors involved in every fall. Describes common slip and trip hazards and recommends safe work practices and techniques to keep viewers upright, stable and balanced. 2011; 19 minutes; DVD 420430; VHS 620430

71. Fire extinguisher basic training

Shows how to use fire extinguishers properly and safely. Describes the five basic classes of fire, when to use an extinguisher and the PASS method. 2009; 14 minutes; DVD 410047; VHS 610047

72. Fire safety for industrial workers

Describes the safe work practices employees should follow to reduce the risk of industrial fires, addressing housekeeping, hazardous materials and static electricity. Reviews what to do if a fire should break out, covering evacuation procedures and fire extinguishers. 2010; 19 minutes; DVD 410051; VHS 610051

73. Handle with care: forklift safety training

Aims to raise forklift operators' everyday safety awareness. Covers inspections, stability, safe operation, and loading trucks and trailers. 2008; 20 minutes; DVD 420390; VHS 620390

74. Hazard communication: your key to chemical safety

Encourages employees to ask the following questions about hazardous materials: What am I working with? Can it hurt me? How do I protect myself? What do I do if something goes wrong? 2009; 13 minutes; DVD 490002; VHS 690002

75. Hazard communication and the global harmonizing system: employee training (Hazard communication and the global harmonizing system)

Helps employees understand the three key elements of the Globally Harmonized System for Hazard Communication (GHS): hazard classification, container labeling and safety data sheets. 2011; 22 minutes; DVD 490056; VHS 690056

76. Hazardous materials labels

Describes container labeling requirements for hazardous materials. Covers HMIS, NFPA, DOT and EPA labeling systems. 2002; 22 minutes; VHS 690049

77. Hearing conservation training for employees

Explains how noise exposure damages hearing and how to prevent hearing loss through audiometric testing, hearing protection and reducing off-the-job noise exposure. 2008; 15 minutes; DVD 420393; VHS 620393

78. High impact safety training for qualified electrical workers

Covers safe work practices for qualified electrical workers, including PPE, approach boundaries, performing live work and de-energizing equipment, to minimize burn and shock hazards. 2002; 20 minutes; VHS 670004

79. High impact welding safety

Recreates six accidents to illustrate potential hazards of welding and cutting operations. Also covers PPE, equipment use, ventilation, and handling of cylinders. 1997; 17 minutes; VHS 620270

80. Hydrogen sulfide employee training

Familiarizes viewers with the hazards of hydrogen sulfide and the precautions necessary to prevent exposure, including respiratory protection, warning sounds and signals and evacuation procedures. 2010; 21 minutes; DVD 490221

81. Industrial crane safety

Provides crane operators an introduction to the safe operation of cranes, including pre-operation inspections, rigging components and making the lift. 2007; 21 minutes; DVD 420353; VHS 620353

82. Industrial fire prevention

Demonstrates how fires start, how to extinguish them, and how to prevent them in an industrial environment. Covers flashpoints, classes of fire, fire extinguisher use, flammable materials, sparks and evacuation. 2003; 22 minutes; DVD 410035; VHS 610035

**83. Lessons learned from hand injuries
(Lessons learned from hand injuries: non graphic)**

Features reenactments of workplace hand injury incidents to encourage safe work practices. Covers protective gloves, nip points, entanglement hazards, assist devices and hand and power tools. 2010; 19 minutes; DVD 420086; VHS 620086

84. Lockout/tagout training for employees

Reviews lockout/tagout procedures used to control hazardous energy. Also covers the energy control plan, situations requiring lockout/tagout, lockout/tagout devices and special situations. 2008; 16 minutes; DVD 470066; VHS 670066

85. More high impact forklift safety (More high impact forklift safety non-graphic)

Examines several tragic lift truck incidents and shows how to avoid similar scenarios by following safe operating practices. Emphasizes operator responsibility. 2004; 20 minutes; DVD 420411; VHS 620411

**86. Operating a telehandler safely
(Telehandler safety)**

Introduces viewers to the safe operation of these rough-terrain powered industrial trucks. Addresses inspection, terrain, lifting and transporting loads, the stability triangle and other safety issues. 2011; 16 minutes; DVD 400094; VHS 600094

87. PPE: head to toe

Reviews the basics of personal protective equipment, including employer and employee responsibilities. Addresses PPE for head, eyes, hearing, breathing, body, hands and feet. 2007; 15 minutes; DVD 420395; VHS 620395

**88. PPE: wear it for you: David's been hurt
(PPE: wear it for you)**

Features the true story of David Dyck, a worker whose life was saved by the personal protective equipment he was wearing. Challenges viewers to wear PPE for ourselves and our families. 2011; 12 minutes; DVD 420017

89. Practical approach to ladder safety

Provides basic precautions to keep workers safe when using ladders. Presents practical tips for both common and special situations. 2006; 19 minutes; DVD 420347; VHS 620347

90. Preventing the spread of contagious illness

Presents recommended precautions to reduce the chances of being infected by swine flu, avian flu, severe acute respiratory syndrome (SARS) or methicillin-resistant staphylococcus aureus (MRSA). Describes the symptoms and ways these illnesses are spread. 2009; 21 minutes; DVD 430003; VHS 630003

91. Protecting our sight

Discusses how the eyes work, common types of eye injuries and how to prevent them, types of eye protection available for a variety of hazards and first aid for injuries. 2011; 18 minutes; DVD 420027; VHS 620027

92. Respiratory protection and safety

Teaches employees about the various kinds of airborne hazards and their potential effects on the body, the different types of respirators used to protect against these hazards and proper respirator use and care. 2006; 24 minutes; DVD 420358; VHS 620358

**93. Severe weather alert: are you prepared
(Severe weather alert)**

Explains general safety practices and procedures related to severe thunderstorms and tornadoes encountered at home, work, school or on the road. 2003; 15 minutes; DVD 490038; VHS 690038

94. That's why you wear eye protection

Discusses various types of eye protection devices and how they help to prevent injuries. Emphasizes the importance of wearing the proper eye protection for each job task. 2004; 17 minutes; VHS 620327
