The manufacturing industry is an important part of Ohio’s economy. Ohio is the third largest state in terms of manufacturing and close to 16 percent of the workforce works in the manufacturing sector. This fact sheet:

- Increases awareness of the primary injury/illness hazards in the manufacturing Industry;
- Offers recommended hazard control measures;
- Provides a partial list of the vast resources available from BWC.

**Industry specific facts**

- Each year, approximately 18,000 employees in the manufacturing industry sustain injuries that result in workers’ compensation claims.
- Each year, an average of 18 Ohioans in the manufacturing industry lose their lives due to occupational injuries or illnesses.
- Approximately 15 percent of worker's compensation claims result eight or more days away from work and cost an average of $29,000 per claim.
- Slips, trips and falls and overexertion are the primary causes for 55 percent of all injuries that result in eight or more days away from work.

**Injury Prevention for the Manufacturing Industry**

The manufacturing industry includes establishments engaged in the mechanical, physical or chemical transformation of materials, substances, or components into new products often using power-driven machines and materials-handling equipment.

BWC has a variety of safety and health services that can assist you with addressing hazardous conditions in your workplace. These include On-site Consultation, Safety Intervention Grants, Training and Video Library Services.

Some of the most hazardous work activities in manufacturing include setting up, operating and servicing machinery, working with dangerous chemicals and substances, working near moving machinery and vehicles and moving heavy materials and equipment.
Injury Prevention for the Manufacturing Industry

Below is one of the primary hazards and/or causes of injuries in the Manufacturing Industry. We recommend the following control measures and BWC resources to help prevent this type of accident from happening in your business. For more information connect with a BWC safety consultant at 1-866-569-7805 or via email at besafe@ohiobwc.com.

Primary hazard/cause:
Open wounds from handling or striking against sharp objects
